Uniset 2

Plastic 6/3 litre Dual Flush Cistern,
Seat and Connection Plate

6.23.1

Uniset 2

Plastic 6/3 litre Dual Flush Cistern, Seat and Connector Plate

The Uniset 2 is a mid sized modern styled cistern designed for retrofit installations. The **Uniset 2** cistern is a two button, dual flush integrated system comprising of cistern, seat and flush fitting connection plate which conceals the flush pipe and water connection. This versatile 6/3 litre dual flush cistern can be converted to 4.5/3 and 9/4.5 litre with the benefit that the matched suites are suitable for multi purpose applications and can be used where authorised for septic installations.

Cistern: A one piece injection moulded tank with a well fitting removable lid housing and centrally positioned white push buttons.

Cistern Mechanism: The cistern incorporates a quiet inlet valve to reduce noise during the filling cycle. The dual flush outlet valve is operated by two clearly marked push buttons which offer the choice of half flush or full flush as required.

Inlet and Overflow: Inlet is in the RH position and is located on the underside of the cistern and is interchangeable. Overflow is internal as standard, external overflow kit available.

Seat: The Tasman Seat and connection plate is supplied with the Uniset 2 Cistern.

Colours: White only.

Dimensions: All dimensions are in millimetres and are subject to normal manufacturing variations. Caroma pursues a policy of continuing improvement in design and performance of its products. The right is therefore reserved to vary specifications without notice.
