## IMPORTANT INFORMATION THAT MAY IMPACT YOUR MANUFACTURER'S WARRANTY

Adherence to the directions for use in this manual is extremely important for health and safety. Failure to strictly adhere to the requirements in this manual may result in personal injury, property damage and affect your ability to make a claim under the AEG manufacturer's warranty provided with your product. Products must be used, installed and operated in accordance with this manual. You may not be able to claim on the AEG manufacturer's warranty in the event that your product fault is due to failure to adhere to this manual.

## FOR PERFECT RESULTS

Thank you for choosing this AEG product. We have created it to give you impeccable performance for many years, with innovative technologies that help make life simpler features you might not find on ordinary appliances. Please spend a few minutes reading to get the very best from it.

Visit our website for:

## CUSTOMER CARE AND SERVICE

Always use original spare parts.

When contacting our Authorised Service Centre, ensure that you have the following data available: Model, PNC, Serial Number.

The information can be found on the rating plate.

 Warning / Caution-Safety information

 General information and tips

 Environmental information

Subject to change without notice.

## 1. SAFETY INFORMATION

Before the installation and use of the appliance, carefully read the supplied instructions. The manufacturer is not responsible if an incorrect installation and use causes injuries and damage. Always keep the instructions with the appliance for future reference.

### 1.1 Children and vulnerable people safety

#### **WARNING!**

Risk of suffocation, injury or permanent disability.

- This appliance can be used by children aged from 8 years and above and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning the use of the appliance in a safe way and understand the hazards involved.
- Children between 3 and 8 years of age and persons with very extensive and complex disabilities shall be kept away from the appliance unless continuously supervised.
- Children of less than 3 years of age should be kept away from the appliance unless continuously supervised.
- Do not let children play with the appliance.
- Keep all packaging away from children and dispose of it appropriately.
- Keep detergents away from children.
- Keep children and pets away from the appliance when the door is open.

- If the appliance has a child safety device, it should be activated.
- Children shall not carry out cleaning and user maintenance of the appliance without supervision.

### 1.2 General Safety

- Do not change the specification of this appliance.
- This appliance is intended to be used in household and similar applications such as:
  - staff kitchen areas in shops, offices and other working environments;
  - farm houses;
  - by clients in hotels, motels, bed & breakfast and other residential type environments;
  - areas for communal use in blocks of flats or in launderettes.
- The appliance shall be installed as a freestanding product or below the kitchen worktop if space margins permit.
- Do not install the appliance behind a lockable door, a sliding door or a door with a hinge on the opposite side, that would prevent the appliance door from being fully open.
- Connect the mains plug to the mains socket only at the end of the installation process. Make sure that the mains plug is accessible after installation.
- The ventilation opening in the base must not be covered by a carpet, mat, or any floor covering.
- **CAUTION:** The appliance must not be supplied through an external switching device, such as a timer, or

- connected to a circuit that is regularly switched on and off by a utility.
- Ensure good air ventilation in the room where the appliance is installed to avoid the backflow of unwanted gases into the room from appliances burning gas or other fuels, including open fires.
  - Exhaust air must not be discharged into a flue which is used for exhausting fumes from any appliances burning gas or other fuels.
  - The operating water pressure at the water entry point from the outlet connection must be between 0.5 bar (0.05 MPa) and 8 bar (0.8 MPa).
  - Do not exceed the maximum load of 10 kg (refer to the "Programme chart" chapter).
  - The appliance must be connected to the water mains using the new supplied hose sets, or other new hose sets supplied by the Authorised Service Centre.
  - Old hose sets must not be reused.
  - If the mains power supply cable is damaged, it must be replaced by the manufacturer, its Authorised Service Centre or similarly qualified persons to avoid an electrical hazard.
  - Wipe away lint or packaging debris that has accumulated around the appliance.
  - Items that have been soiled with substances such as vegetable or mineral oil, acetone, alcohol, petrol, kerosene, spot removers, turpentine, waxes and wax removers should be washed separately with an extra amount of detergent before being dried in the washer dryer.
  - Do not use the appliance if items have been soiled with industrial chemicals.
  - Do not dry unwashed items in the wash dryer.
  - Items such as foam rubber (latex foam), shower caps, waterproof textiles, and rubber backed articles and clothes, or pillows fitted with foam rubber pads should not be dried in the washer dryer.
  - Fabric softeners, or similar products, should only be used as specified by the product manufacturer's instructions.
  - Remove all objects from items that could be a source of fire ignition such as lighters or matches.
  - Never stop the washer dryer before the end of the drying cycle unless all items are quickly removed and separated so that residual heat can dissipate.
  - The final part of the washer dryer cycle takes place without heat (cool down cycle) to ensure that items reach a temperature that will not cause damage to them.
  - Do not use high pressure water sprays and/or steam to clean the appliance.
  - Clean the appliance with a moist cloth. Use only neutral detergents. Do not use abrasive products, abrasive cleaning pads, solvents or metal objects.
  - Before any maintenance operation, deactivate the appliance and disconnect the mains plug from the socket.

## 2. SAFETY INSTRUCTIONS

### 2.1 Installation

The installation must comply with relevant national regulations.

- Follow the installation instructions supplied with the appliance.
- Do not install or use the appliance where the temperature can be less than 0°C or where it is exposed to the weather.
- Always keep the appliance vertical when it is being moved.
- Make sure that there is air circulation between the appliance and the floor.
- Remove all the packaging and the transit bolts.
- The floor area on which the appliance is to be installed must be flat, stable, heat resistant and clean.
- Keep the transit bolts in a safe place. If the appliance is to be moved in the future they must be reattached to lock

the drum to prevent an internal damage.

- Always take care when moving the appliance as it is heavy. Always use safety gloves and enclosed footwear.
- Do not install or use a damaged appliance.
- Do not install the appliance where the appliance door cannot be fully opened.
- Adjust the feet to have the necessary space between the appliance and the flooring.
- When the appliance is in its permanent position, check if it is levelled correctly with the aid of a spirit level. If it is not, adjust the feet accordingly.

## 2.2 Electrical Connection

### **WARNING!**

Risk of fire and electric shock.

- The appliance must be earthed.
- Always use a correctly installed shockproof socket.
- Do not use multi-plug adapters and extension cables.
- Do not pull the mains cable to disconnect the appliance. Always pull the mains plug.
- Do not touch the mains cable or the mains plug with wet hands.

## 2.3 Water Connection

- Do not cause damage to the water hoses.
- Before connection to new pipes, pipes not used for a long time, where repair work has been carried out or new devices fitted (water meters, etc.), let the water flow until it is clean and clear.
- Ensure that there are no visible water leaks during and after the first use of the appliance.

## 2.4 Use

### **WARNING!**

Risk of injury, electric shock, fire, burns or damage to the appliance.

- This appliance is for household use only.
- Do not change the specification of this appliance.
- Do not put flammable products or items that are wet with flammable products in, near or on the appliance.
- Do not touch the glass of the door while a programme operates. The glass can be hot.
- Do not dry the damaged items which contain padding or fillings.
- If you have washed your laundry with a stain remover start an extra rinse cycle before you start a drying cycle.
- Make sure that you remove all metal objects from the laundry.
- Only dry fabrics which are applicable to dry in the washer-dryer. Follow the instructions on the fabric label.
- Plastic items are not heat resistant.
  - If you use a detergent ball, remove it before you set the drying programme.
  - Do not use a detergent ball when you set a non-stop programme.

### **WARNING!**

Risk of injury or damage to the appliance.

- Do not sit or stand on the open door.
- Do not dry dripping wet clothes in the appliance.
- Oil-affected items can ignite spontaneously, especially when exposed to heat sources such as in a tumble dryer. The items become warm, causing an oxidation reaction in the oil. Oxidation creates heat. If the heat cannot escape, the items can become hot enough to catch fire. Piling, stacking or storing oil-affected items can prevent heat from escaping and create a fire hazard.
- If it is unavoidable that fabrics that contain vegetable or cooking oil or have been contaminated by hair care products be placed in a tumble dryer they should first be washed in hot water with extra detergent -this will reduce, but not eliminate, the hazard.

## 2.5 Service

- To repair the appliance contact the Authorised Service Centre.

- Use original spare parts only.

## 2.6 Disposal

- Disconnect the appliance from the mains electrical and water supplies.
- Cut off the mains electrical cable close to the appliance and dispose of it.

- Remove the door catch to prevent children or pets from becoming trapped in the drum.
- Dispose of the appliance in accordance with local requirements for the disposal of Waste Electrical and Electronic Equipment (WEEE).

## 3. INSTALLATION

**WARNING!**  
Refer to Safety chapters.

### 3.1 Unpacking

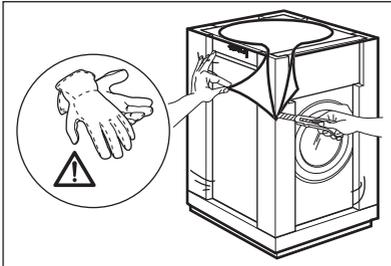

**WARNING!**  
Remove all the packaging and the transit bolts before installing the appliance.

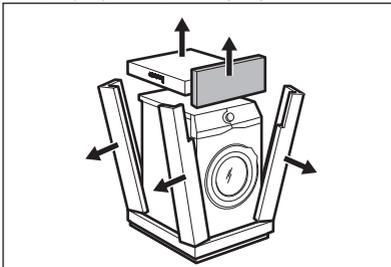

**WARNING!**  
Use the gloves.

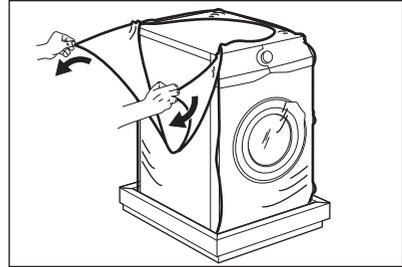

1. Remove the external film. If necessary, use a cutter.

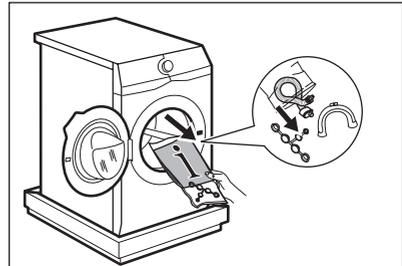

2. Remove the cardboard top and the polystyrene packaging materials.

3. Remove the internal film.

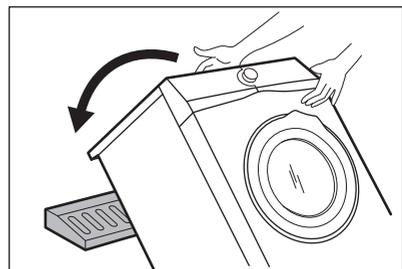

4. Open the door and remove the polystyrene piece from the door seal and all the items from the drum.

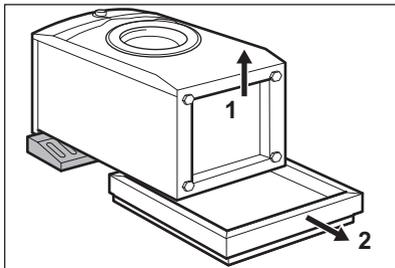

5. Carefully put the appliance down on its rear side.
6. Put the front polystyrene packaging element on the floor under the appliance.

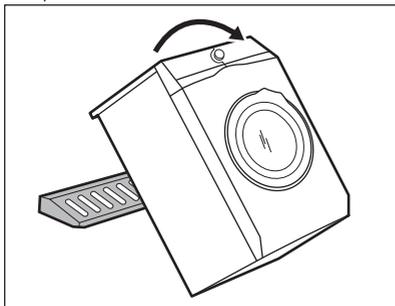

Make sure not to damage the hoses.

7. Remove the polystyrene protection from the bottom.

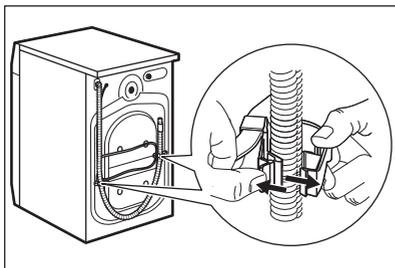

8. Pull up the appliance in vertical position.

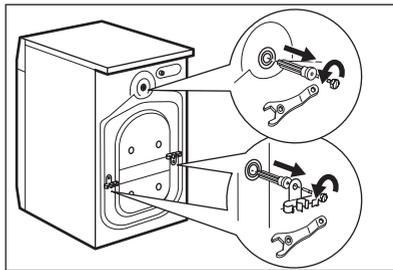

9. Remove the power supply cable and the drain hose from the hose holders.

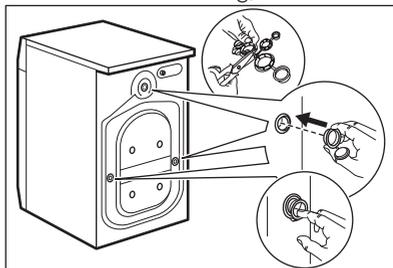

**i** It is possible to see water flowing from the drain hose. This is due to the testing with water of the appliance in factory.

10. Remove the three bolts by using the spanner supplied with the appliance.

11. Pull out the plastic spacers.  
12. Put the plastic caps, that you find in the user manual bag, in the holes.

**i** We recommend that you keep the packaging and the transit bolts for any movement of the appliance.

### 3.2 Positioning and levelling

1. Install the appliance on a flat hard floor.

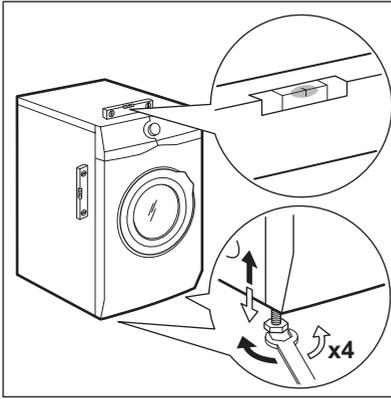

**i** Make sure that carpets do not stop the air circulation below the appliance. Make sure that the appliance does not touch the wall or other units.

2. Loosen or tighten the feet to adjust the level.

#### **WARNING!**

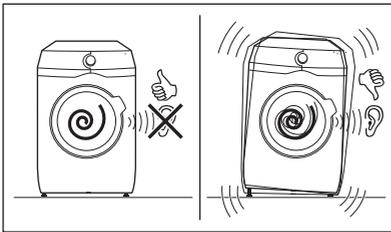

Do not put cardboard, wood or equivalent materials below the appliance feet to adjust the level.

The appliance must be level and stable.

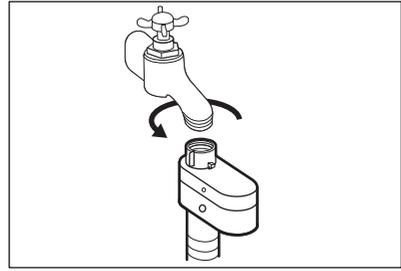

**i** A correct adjustment of the appliance level prevents the vibration, noise and the movement of the appliance when in operation.

**i** When the machine is installed on a plinth or if a washer dryer is stacked on the washing machine, use the accessories described in chapter 'Accessories'. Read carefully the instructions supplied with the appliance and with the accessory.

### 3.3 The inlet hose

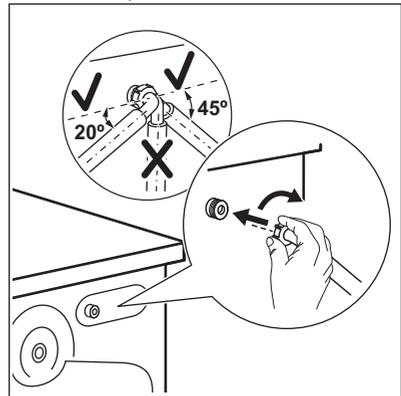

1. Connect the water inlet hose to the cold water tap with 3/4" BSP thread. If necessary, use a spanner.

**i** Use the hose supplied with the appliance.

**!** **CAUTION!** Make sure that there are no leaks from the couplings.

2. Connect the other end of the inlet hose to the back of the appliance. The hose can be turned in any direction.
3. Position it toward left or right depending on the position of the water tap.

**i** Make sure that the inlet hose is not in vertical position.

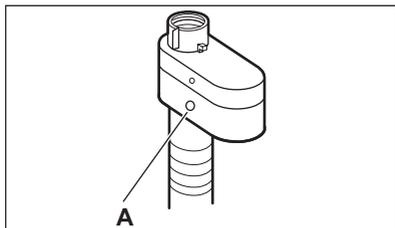

4. If necessary, loose the ring nut to set it in the correct position. Simply loosen the fitting, rotate the hose and retighten the fitting, making sure there are no water leaks.

**i** Do not use an extension hose if the inlet hose is too short. Contact the service centre for purchasing a new, longer hose specially designed for this type of use.

### 3.4 Water-stop device

The inlet hose has a water stop device. This device prevents water leaks in the hose because of its natural ageing.

The red sector in the window «A» shows this fault.

If this occurs, close the water tap and contact the authorized service centre to replace the hose.

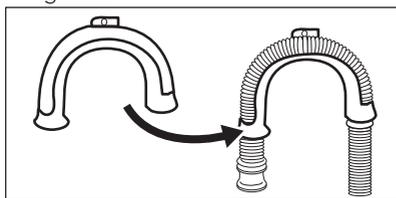

### 3.5 Water drainage

The drain hose should be positioned at a height of not less than 60 cm and not more than 100 cm from the floor.

- i** You can extend the drain hose to maximum 400 cm. Contact the authorized service centre for the other drain hose and the extension.

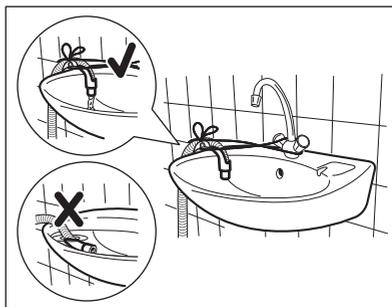

It is possible to connect the drain hose in different ways:

1. Make a U shape with the drain hose and put it around the plastic hose guide.

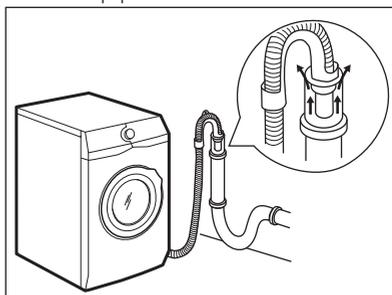

2. **On the edge of a sink** - Fasten the guide to the water tap or to the wall.

- i** Make sure that the plastic guide cannot move when the appliance drains.

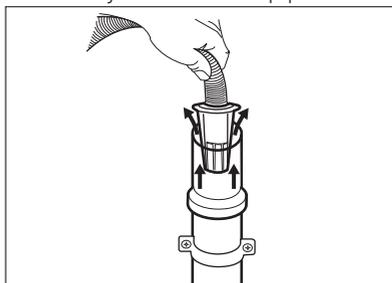

- i** Make sure that the drain hose end is not immersed in the water. There may be a return of dirty water into the appliance.

3. **To a stand pipe with vent-hole** - Insert the drain hose directly into a drain pipe. Refer to the illustration.

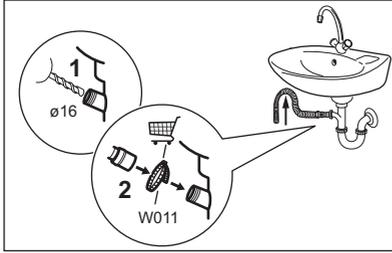

- i** The end of the drain hose must always be ventilated, i.e. the inner diameter of the drain pipe (min. 38 mm - min. 1.5") must be larger than the external diameter of the drain hose.

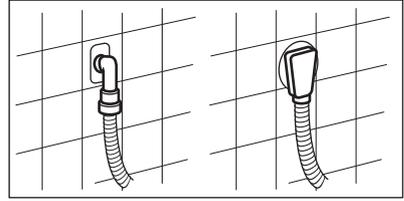

4. If the end of the drain hose looks like this (see the picture), you can push it directly into the stand pipe.

5. Without the plastic hose guide, to a sink spigot - Remove the plastic membrane from the sink trap spigot.
6. Connect the drain hose to the spigot and tighten it with a clamp.

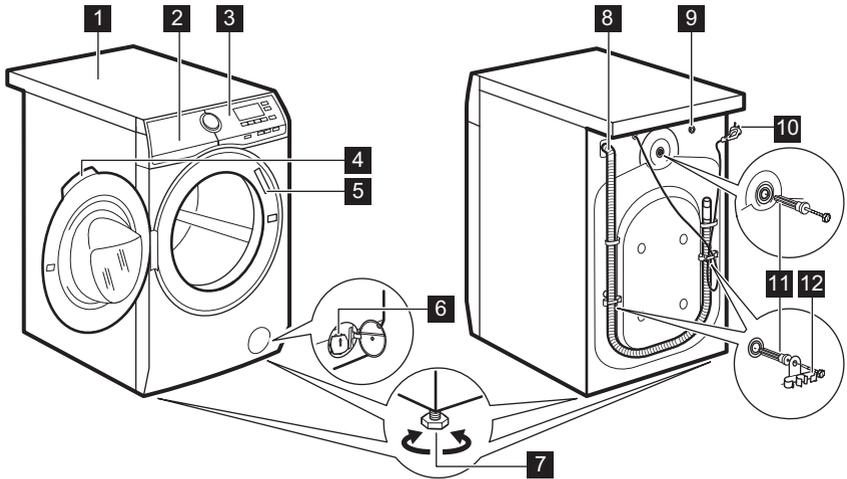

7. Position the hose directly to a built-in drain pipe in the room wall and tighten it with a clamp.

### 5.2 Display

	Laundry weight indicator. The <b>kg</b> icon flashes during laundry load estimation (refer to "SensiCare System load detection" paragraph).
<b>MAX</b>	Maximum laundry indicator. It flashes when the laundry load exceeds the maximum declared load of the selected programme.
	Detergent quantity indicator: the value shows the percentage of detergent quantity needed.
	Child safety lock indicator.
	Drying time indicator.
	Door locked indicator.
	The digital indicator can show: <ul style="list-style-type: none"> <li>• Programme duration (e. g. <b>2:40</b>, washing and/or drying phase).</li> <li>• Delay time (e. g. <b>30'</b> or <b>2h</b>).</li> <li>• Cycle end ().</li> <li>• Warning code (e.g. <b>E20</b>).</li> </ul>
	Washing phase indicator: it flashes during prewash and wash phase.
	Rinsing phase indicator. It flashes during rinse phase.
	The permanent Extra Rinse option: <ul style="list-style-type: none"> <li>•  - one additional rinse.</li> <li>•  - two additional rinses.</li> </ul>
	Spin and drain phase indicator. It flashes during spin and drain phase.
	OKO MIX indicator.
	Steam phase indicator.
	Drying phase indicator.
	Iron drying indicator.
	Cupboard drying indicator.
	Extra drying indicator.
<b>*60</b>	Temperature indicator. The <b>*</b> indicator appears when a cold wash is set.
<b>1600</b>	Spin speed indicator.

	Rinse hold indicator.
	Extra silent indicator.
	Pre-wash indicator.
	Stain indicator.
<b>ECO</b>	Energy saving indicators. It appears when you set the Cottons Eco programme.
	Delay start indicator.

## 6. DIAL AND BUTTONS

### 6.1 On/Off

Pressing this button for a few seconds allows to activate or deactivate the appliance. Two different tunes sound while switching the appliance on or off.

As the Stand-by function automatically deactivates the appliance to decrease the energy consumption in a few cases, you may need to activate the appliance again.

For more details, refer to Stand-by paragraph in Daily Use chapter.

### 6.2 Introduction

The options/functions are not selectable with all washing programmes. Check the compatibility between options/functions and washing programmes in the "Programme Chart". An option/function can exclude another one, in this case the appliance doesn't allow you to set the incompatible options/functions together. Make sure the screen and touch buttons are always clean and dry.

### 6.3 Temp.

When you select a washing programme, the appliance automatically proposes a default temperature.

Touch this button repeatedly until the desired temperature value appears on the display.

When the display shows the indicators  and , the appliance does not heat the water.

### 6.4 Spin

When you set a programme, the appliance automatically selects the maximum spin speed.

Touch this button repeatedly to:

- **Decrease the spin speed.**

The display shows only the spin speeds available for the set programme.

- **Activate the Rinse Hold option .**  
The water of the last rinse is not drained out to prevent the fabrics from creasing. The washing programme ends with water in the drum and the final spin phase is not performed.

The display shows the indicator . The drum turns regularly to reduce creasing.

The door stays locked. The drum turns regularly to reduce creasing. You must drain the water to unlock the door.

Touch Start/Pause button: the appliance performs the spinning phase and drains the water.

- **Activate the Quiet option.**

All spinning phases (intermediate spin and final spin) are suppressed and the programme ends with water in the drum. This helps to reduce creasing. As the programme is very quiet, it is suitable for use at night time when cheaper electricity tariffs are available. In some programmes the rinses are performed with more water.

The display shows the indicator . The door stays locked. The drum turns regularly to reduce creasing. You must drain the water to unlock the door. Touch the Start/Pause button: the appliance performs only the draining phase.

-  The appliance empties the water out automatically after approximately 18 hours.

## 6.5 Stains/Prewash

Press this button repeatedly to activate one of the two options.

The relevant indicator goes on in the display.

- **Stains** 

Select this option to pre-treat heavily soiled or stained laundry using stain remover. Pour the stain remover into compartment . The stain remover is pre-mixed and heated with detergent in order to improve its effectiveness.

  -  This option can increase the programme duration.
  -  This option is not available with a temperature lower than 40 °C.
- **Prewash** 

Use this option to add a prewash phase at 30 °C before the washing phase. This option is recommended for heavily soiled laundry, especially if containing sand, dust, mud and other solid particles.

-  This option can increase the programme duration.

-  These two options cannot be set together.

## 6.6 Delay Start

With this option you can delay the start of a programme in a more convenient time.

Tap on the button repeatedly to set the required delay. The time increases by steps of 30 minutes up to 90' and from 2 hours up to 20 h.

After starting the cycle by the means of the Start/Pause button, the display shows the selected delay time and the appliance begins the countdown.

## 6.7 Quick Wash

With this option you can decrease the programme duration.

- If your laundry is normally or lightly soiled, it may be advisable to shorten the washing programme. Touch this button **once** to decrease the duration.
- In case of smaller load, touch this button **twice** to set an extra quick programme.

On the display the programme duration is adjusted accordingly.

When this button is set, the led above the button is on.

-  This option can also be used to shorten the Steam programme duration.

## 6.8 Anti-crease

This option adds a short anti-crease phase at the end of the programme.

This phase reduces fabric creasing and facilitates the fabric ironing.

When this option is set, the led above the button is on and then blinks during anti-crease phase.

-  This option can increase the programme duration.

By touching any button the anti-crease movements stop and the door unlocks.

## 6.9 Time Drying

Touch this button to set the time that suits the fabrics you have to dry (refer to "Timed drying" table). The display shows the set value.

Each time you touch this button the time value increases by 5 minutes.

 You cannot set all time values for different types of fabrics.

## 6.10 Auto Drying

Touch this button to set one of 3 automatic dryness levels proposed by the appliance.

On the display the relevant dryness indicator goes on:

-  = **Iron dry**: laundry to be ironed.

-  = **Cupboard dry**: laundry to be put in store.
-  = **Extra dry**: laundry to be fully dried.

 You can not set all automatic levels for each type of fabrics.

## 6.11 Mode

Thanks to this button, a cycle can perform:

- **Only washing** : Wash indicator is on.
- **Washing and drying** : Wash and Dry indicators are on.
- **Only drying** : Dry indicator is on.

## 6.12 Start/Pause

Touch the Start/Pause button to start, pause the appliance or interrupt a running programme.

# 7. PROGRAMS

## 7.1 Program Chart

Program	Program description
<b>Washing programs</b>	
Cottons	<b>White cotton and coloured cotton.</b> Normal, heavy and light soil.
Cottons Eco	<b>White cotton and coloured cotton.</b> Normal, heavy and light soil. The Cottons Eco program at 40 °C is recommended for a full load of cotton and is the water and energy rating label program in accordance with AS/NZS2040 and AS/NZS6400.
Synthetics	<b>Synthetic items or mixed fabric items.</b> Normal soil.
Delicates	<b>Delicate fabrics such as acrylics, viscose and mixed fabrics requiring gentler washing.</b> Normal soil.
 Wool/Handwash	<b>Machine washable wool, hand washable wool and other fabrics with «hand washing» care symbol<sup>1)</sup>.</b>

Program	Program description
 Outdoor	<p> Do not use fabric softener and make sure that there is no softener residue in the detergent dispenser.</p> <p><b>Outdoor clothing, technical, sport fabrics, waterproof and breathable jackets, shell jackets with a removable fleece or inner insulation.</b></p> <p> By performing a combined wash and dry program, the drying phase also acts as water repellent restorer. Make sure that the garment care label permits tumble drying.</p>
<b>Wash&amp;Dry program</b>	
OKOPower	<p><b>Mixed fabrics (cotton and synthetic items).</b> Complete programme to wash and dry 5 kg of garments in only 4 hours.</p> <p><b>Mixed fabrics (cotton and synthetic items).</b> Complete program to wash and dry 5 kg of garments in only 4 hours.</p> <p>Also, the indicator  appears on the display.</p>
<b>Steam program</b>	
 Steam	<p><b>Steam program for cotton and synthetic items.</b></p> <p>Steam can be used for dried<sup>2)</sup>, washed or worn once laundry. This program reduce creases and odours<sup>3)</sup> and relaxes the fibres. When the program is completed, quickly remove the laundry from the drum. After a steam program, ironing becomes effortless. Do not use any detergent. If necessary, remove stains by washing or using localized stain removal. Steam program do not perform any hygienic cycle. Do not set this programme with these types of items:</p> <ul style="list-style-type: none"> <li>• Items that are not suitable for tumble drying.</li> <li>• Items with label "Dry clean only".</li> </ul>
<b>Additional programs</b>	
Rinse	To rinse and spin the laundry. <b>All fabrics</b> , except woollens and very delicate fabrics. Reduce the spin speed accordingly to the type of laundry.
Spin/Drain	<b>All fabrics, except woollens and delicate fabrics.</b> To spin the laundry and to drain the water in the drum.

<sup>1)</sup> During this cycle the drum rotates slowly to ensure a gentle wash. It can seem that the drum doesn't rotate or doesn't rotate properly, but this is normal for this program.

<sup>2)</sup> If you set a this program with dried laundry, at the end of the cycle the laundry can be humid. Line dry the items for about 10 minutes.

<sup>3)</sup> Steam program doesn't remove particularly intense odour.

Program temperature, maximum spin speed and maximum load

Program	Default temperature Temperature range	Reference spin speed Spin speed range	Maximum load
Cottons	40 °C 95 °C - Cold	1600 rpm 1600 rpm - 400 rpm	10 kg
Cottons Eco	60 °C 60°C - 40 °C	1600 rpm 1600 rpm - 400 rpm	10 kg
Synthetics	40 °C 60 °C - Cold	1200 rpm 1200 rpm - 400 rpm	4 kg
Delicates	40 °C 40 °C - Cold	1200 rpm 1200 rpm - 400 rpm	4 kg
 Wool/Handwash	40 °C 40 °C - Cold	1200 rpm 1200 rpm - 400 rpm	2 kg

1) If you set No Spin option, the appliance only drains the water.

2) This option is not available with temperature lower than 40 °C.

3) If you set the shortest duration, we recommend that you decrease the load size. It is possible to fully load the appliance, however the washing results can be less satisfactory.

4) Iron Dry is not available with this program.

## 7.2 Woolmark Apparel Care - Blue

- The wool wash cycle of this machine has been approved by The Woolmark Company for the washing of wool garments labelled as "hand wash" provided that the products are washed according to the instructions on the garment label and those issued by the manufacturer of this washing machine. M1144
- The wool drying cycle of this machine has been tested and approved by The Woolmark Company. The cycle is suitable to dry wool garments which are labelled "hand wash" provided that the garments are washed in a

Woolmark endorsed hand washing cycle and dried according to the instructions issued by the manufacturer. M1224

In UK, Eire, Hong Kong and India the Woolmark symbol is a certification trademark.

### 7.3 Timed drying

Dryness Level	Type of fabric	Load (kg)	Spin speed (rpm)	Suggested duration (mins)

### 7.4 Automatic drying

Dryness Level	Type of fabric	Load
<b>Extra Dry<sup>1)</sup></b> For towelling materials	<b>Cottons and Linen</b> (bathrobes, bath towels, etc)	up to 6 kg

Dryness Level	Type of fabric	Load
For items to be stored	<b>Cottons and Linen</b> (bathrobes, bath towels, etc)	up to 6 kg
	<b>Synthetics and mixed fabrics</b> (jumpers, blouses, underwear, household and bed linen)	up to 4 kg
	<b>Delicate fabrics</b> (acrylics, viscose and delicate mixed fabrics)	up to 2 kg
	<b>Wool items</b> (woollen jumpers)	up to 1 kg
	<b>Outdoor sporting garments</b> (outdoor clothing, technical, sport fabrics, waterproof and breathable jackets, shell jackets)	up to 2 kg
<b>Iron Dry</b> Suitable for ironing	<b>Cottons and Linen</b> (sheets, tablecloths, shirts, etc)	up to 6 kg

<sup>1)</sup> **Hints for test institute.** The test performance, in accordance with AS/NZS 2442.1, must be carried out by setting the EXTRA DRY for Cottons Eco program.

## 8. BEFORE FIRST USE

During installation or before first use you may observe some water in the appliance. This is a residual water left in the appliance after a full functional test in the factory to ensure the appliance is delivered to customers in perfect working order and is no cause for concern.

1. Make sure that all transit bolts have been removed from the appliance.

2. Make sure that the electrical power is available and the water tap is open.
3. Pour 2 litres of water into the detergent compartment marked by .

This action activates the drain system.

4. Set and start a programme for cotton at the highest temperature without any detergent and laundry in the drum.

## 9. SETTINGS

### 9.1 Child Lock

With this option you can prevent that the children play with the control panel.

- To **activate/deactivate** this option, touch the Stains/Prewash and the

Delay Start buttons simultaneously

until the indicator  **comes on/goes off** on the display.

You can activate this option:

- After you touch the Start/Pause button: all the buttons and the programme dial are deactivated (except On/Off button).
- Before you touch the Start/Pause button: the appliance cannot start. The appliance keeps the selection of this option after you switch it off.

## 9.2 Acoustic signals

This appliance is provided with different acoustic signals, that operate when:

- You activate the appliance (special short tune).
- You deactivate the appliance (special short tune).
- You touch the buttons (click sound).
- You make a wrong selection (3 short sounds).
- The programme is completed (sequence of sounds for about 2 minutes).
- The appliance has a malfunction (sequence of short sounds for about 5 minutes).

To **deactivate/activate** the acoustic signals when the programme is

completed, touch the Delay Start and the Quick Wash buttons simultaneously for about 6 seconds.

If you deactivate the acoustic signals, they continue operate when the appliance has a malfunction.

## 9.3 Permanent Extra Rinse

With this option you can permanently have one or two extra rinses when you set a new programme.

- Simultaneously touch the Temp. button and the Spin button once to add one extra rinse.  appears on the display.
- Simultaneously touch the Temp. button and the Spin button twice to add two extra rinses.  appears on the display.
- Simultaneously touch the Temp. button and the Spin button three times to remove extra rinses. The display only shows .

# 10. DAILY USE

### WARNING!

Refer to Safety chapters.

## 10.1 Using weight sensors

For a correct use of the weight sensor, the drum must be empty when activating the appliance. Set the programme **BEFORE** you put the laundry in the drum.

## 10.2 Before activating the appliance

1. Make sure that the mains plug is connected to the mains socket.
2. Make sure that the water tap is open.

## 10.3 Activating the appliance and setting a programme

1. Press button On/Off for a few seconds to activate the appliance. The programme dial is automatically set on cotton programme and only the Wash indicator is on. The indicator of Start/Pause button flashes.
2. Turn the programme knob to the necessary programme. The programme indicator comes on. The display shows the maximum load, the default temperature, the maximum spin speed, the indicators of the phases making up the programme and the programme duration.
3. If it is necessary, touch the Temp. button and the Spin button to change the water temperature and the spin speed.

- If necessary, touch the related buttons to add some options and/or to set a delayed start.

The display shows the symbol of the set option and/or the digit shows the delayed time.

## 10.4 Loading the laundry

- Open the appliance door.

The display shows  kg.

- Shake the items before you put them in the drum. Put the laundry in the drum, one item at time.

On the display the weight of the laundry is updated by steps of kg 0.5 and the programme duration is updated accordingly. The weight is indicative and changes with the type of the laundry.

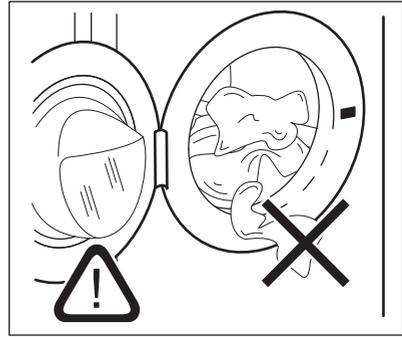

If you put in the drum more laundry than the maximum load, the symbol **MAX** flashes for a few seconds and shows the maximum recommended load. You can wash your laundry anyway, but the water and energy consumption increase.

To have the best consumption and washing performance remove the exceeding items.

The overload indication is shown only in programmes with a maximum load lower than the appliance maximum load.

- Close the door. Make sure that no laundry stays between the seal and the door. There is a risk of water leakage or damage to the laundry.

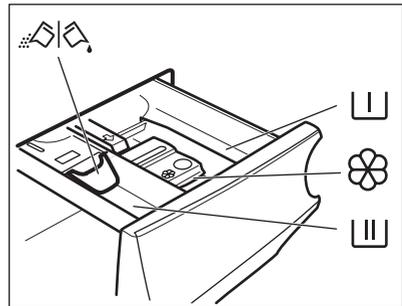

- The display shows the percentage of detergent quantity needed .

This data is indicative and refers to the detergent dosage recommended for a maximum load on the detergent package.

If you change the washing programme after closing the door, the display could show  to indicate a possible overload: open the door and remove a few garments.

## 10.5 Filling the detergent and additives

Compartment for prewash phase, soak programme or stain remover.

Compartment for washing phase.

Compartment for liquid additives (fabric conditioner, starch).

**MAX**

Maximum level for quantity of liquid additives.

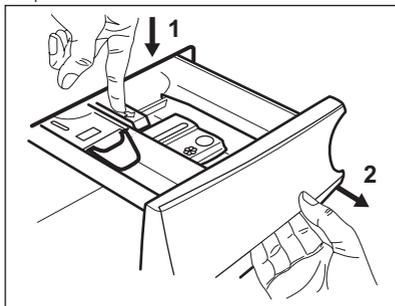

Flap for powder or liquid detergent.

- i** Always follow the instructions that you find on the packaging of the detergent products, but we recommend that you do not exceed the maximum indicated level (**MAX**). This quantity will however guarantee the best washing results.

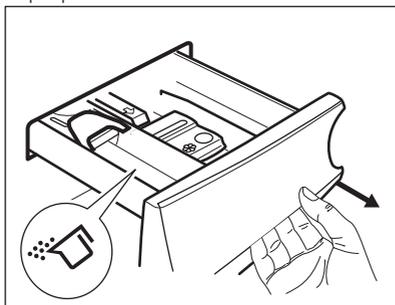

- i** After a washing cycle, if necessary, remove any detergent residue from the detergent dispenser.

## 10.6 Check the position of the flap

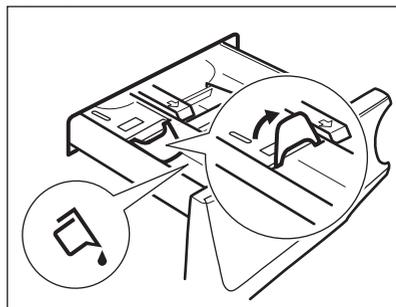

1. Pull out the detergent dispenser until it stops.
2. Press the lever down to remove the dispenser.

3. To use powder detergent, turn the flap up.

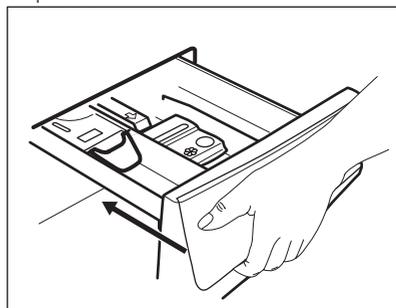

4. To use liquid detergent, turn the flap down.

- i** **With the flap in the position DOWN:**

- Do not use gelatinous or thick liquid detergents.
  - Do not put more liquid detergent than the limit shown on the flap.
  - Do not set the prewash phase.
  - Do not set the delay start function.
5. Measure out the detergent and the fabric conditioner.
  6. Carefully close the detergent dispenser.

Make sure that the flap does not cause a blockage when you close the drawer.

## 10.7 Starting a programme

Touch the Start/Pause button to start the programme.  
The related indicator stops flashing and stays on.

In the display, the indicator of the operating phase starts flashing and the detergent percentage indicator goes off. The programme starts, the door is locked. The display shows the indicator

The drain pump can operate shortly before the appliance fills water.

## 10.8 Starting a programme with the delay start

1. Touch the Delay Start button repeatedly until the display shows the desired delay time. The indicator

2. Touch the Start/Pause button.

The appliance starts the countdown of the delay start.

When the countdown is completed, the programme starts.

The estimation starts at the end of the countdown.

## Cancelling the delay start after the countdown has started

To cancel the delay start:

1. Touch the Start/Pause button to pause the appliance. The related indicator flashes.
2. Touch the Delay Start button repeatedly until the display shows .
3. Touch the Start/Pause button again to start the programme immediately.

## Changing the delay start after the countdown has started

To change the delay start:

1. Touch the Start/Pause button to pause the appliance. The related indicator flashes.
2. Touch the Delay Start button repeatedly until the display shows the desired delay time.
3. Touch the Start/Pause button again to start the new countdown.

## 10.9 The load detection

After touching the Start/Pause button:

1. The detergent percentage indicator goes off, the indicator  flashes.
2. The starts the laundry load detection to calculate the real programme duration. The time dots  flash.
3. After about 15 minutes the display shows the new programme duration: the time dots  stop flashing. The appliance adjusts automatically the programme duration to the load to achieve perfect washing results in the minimum possible time. The programme duration could increase or decrease.

The detection is carried out with complete washing programmes only (no skipping phase selected).

## 10.10 Programme phase indicators

When the programme starts the indicator of the running phase flashes and the other phase indicators are steady on.

E.g. the washing or pre wash phase is

running: .

When the phase ends the relevant indicator stops flashing and is steady on. The next phase indicator starts flashing.

E.g. the rinse phase is running:

During the washing cycle, the appliance mixes the detergent, the stain removal for fabric treatment and/or the fabric softener with water before introducing them into the drum; the indicator  appears and disappears on the display according to the different programme phases (the arrows flash alternatively).

If you select the Steam programme the steam phase indicator  comes on.

## 10.11 Interrupting a programme and changing the options

When the programme is running, you can change **only some** options:

1. Touch the Start/Pause button. The related indicator flashes.
2. Change the options. The given information in the display changes accordingly.
3. Touch the Start/Pause button again. The washing programme continues.

## 10.12 Cancelling a running programme

1. Press the On/Off button to cancel the programme and to deactivate the appliance.
2. Press the On/Off button again to activate the appliance.

Now, you can set a new washing programme.

**i** If the ProSense phase is already carried out and the water filling is already started, the new programme starts **without repeating the ProSense phase**. The water and the detergent are not drained out in order to avoid waste.

## 10.13 Opening the door - Adding garments

While a programme or the delay start operates, the appliance door is locked.

**i** If the temperature and level of the water in the drum are too high and/or the drum still rotates you cannot open the door.

1. Touch the Start/Pause button. In the display the related door lock indicator goes off.
2. Open the appliance door. If necessary, add or remove the items.
3. Close the door and touch the Start/Pause button.

The programme or the delay start continues.

4. The door can be opened when the programme is complete, or set spinning or draining programme/option and then press Start/Pause button.

## 10.14 End of the programme

When the programme has finished, the appliance stops automatically. The acoustic signals operate (if they are active).

In the display all washing phase indicators become steady and the time area shows .

The indicator of the Start/Pause button goes off.

The door unlocks and the indicator  goes off.

1. Press the On/Off button to deactivate the appliance. After five minutes from the end of the programme, the energy saving function automatically deactivates the appliance.

**i** When you activate the appliance again, the display show the end of the last selected programme. Turn the programme dial to set a new cycle.

2. Remove the laundry from the appliance.
3. Make sure that the drum is empty.
4. Keep the door and the detergent dispenser slightly ajar to prevent mildew and odours.
5. Close the water tap.

## 10.15 Draining water out after end of cycle

If you have chosen a programme or an option that does not empty out the water of the last rinse, the programme is completed, but:

- The display shows the indicator , the option indicator  or  and the door locked indicator . The

indicator of the running phase  flashes.

- The drum still turns at regular intervals to prevent the creases in the laundry.
  - The door stays locked.
  - You must drain the water to open the door:
1. If necessary, touch the Spin button to decrease the spin speed proposed by the appliance.
  2. Touch the Start/Pause button:
    - If you have set , the appliance drains the water and spins.
    - If you have set , the appliance only drains the water.

The option indicator  or  goes off, while the indicator  flashes and then goes off.

3. When the programme is completed and the door locked indicator  goes off, you can open the door.
4. Press the On/Off button a few seconds to deactivate the appliance.

 In any case, the appliance empties the water out automatically after approximately 18 hours.

## 10.16 Stand-by option

The Stand-by function automatically deactivates the appliance to decrease the energy consumption when:

- You do not use the appliance for 5 minutes before you touch the Start/Pause button.  
Press the On/Off button to activate the appliance again.
- After 5 minutes from the end of the washing programme  
Press the On/Off button to activate the appliance again.  
The display shows the end of the last set programme.  
Turn the programme dial to set a new cycle.

 If you set a programme or an option that ends with water in the drum, the Stand-by function **doesn't deactivate** the appliance to remind you to drain the water.

## 11. DAILY USE - WASHING & DRYING

**WARNING!**  
Refer to Safety chapters.

This appliance is an automatic washer dryer.

### 11.1 Complete wash&dry programmes

#### Automatic Non-Stop programme

The appliance is equipped with the Non Stop 60min programme, an automatic wash&dry programme where it is not necessary to set the Dry mode.

To run this programme:

1. After loading laundry and detergent, press the On/Off button for some seconds to activate the appliance.
2. Set the Non Stop 60min programme by means of the programme dial.

The indicator  appears on the display

3. Touch the Start/Pause button to start the programme.

#### Non-automatic wash&dry programmes

In some washing programmes, you can combine Wash and Dry mode for running a complete wash&dry programme.

Proceed as follows:

1. Press the On/Off button for some seconds to activate the appliance.

2. Turn the programme dial to the desired washing programme. The display shows the default temperature and spin. If necessary, change them according to your laundry. The display also shows the maximum recommended load for washing phase.
3. Set the desired options, if there are available.
4. Touch the Mode button once to activate also the drying function. The Wash and Dry indicators come on.

The indicators  and  appear on the display. The display also shows the maximum recommended load for a washing and drying programme (e.g. 6 kg for cottons).

5. Open the door and load the laundry one item at a time. On the display the weight of the laundry is updated by steps of kg 0.5 and the programme duration is updated accordingly.
6. Close the door.
7. Put the detergent and the additives in the appropriate compartment.

 When drying a large laundry load, make sure that the garments are not rolled up and that are uniformly distributed in the drum.

## 11.2 Washing and Drying - Automatic levels

1. Tap on the Auto Drying button repeatedly until the display shows the required dryness level. The indicators in the display illuminate accordingly:
  - a.  =  =  **Iron dry:** for cotton items;
  - b.  =  =  **Cupboard dry:** for cotton and synthetic items;
  - c.  =  =  **Extra dry:** for cotton items.

**The time value on the display is the duration of both cycles washing and drying.**

 To have a good drying by using less energy and in a shorter time, the appliance does not let you set a too low spin speed for the items to be washed and dried.

2. Touch button Start/Pause to start the programme. The estimation starts.

In the display the door locked  indicator goes on, the indicator of the running phase starts flashing. The display also shows the remaining programme time.

## 11.3 Washing and Timed Drying

1. Tap on the button Time Drying repeatedly to set the desired time value (see the "Timed drying" table the "Programmes" chapter). The drying level indicator goes off and the indicator  comes on.

Each time you tap on this button the time value increases by 5 minutes. The display shows the set new time value.

2. Touch the Start/Pause to start the programme. The estimation starts.

In the display the door locked  indicator comes on and the indicator of the running phase starts flashing. The display also shows the remaining programme time.

## 11.4 At the end of the drying programme

- The appliance stops automatically.
- The acoustic signals operate (if they are active).
- In the display  comes on.
- The indicator of button Start/Pause goes off. The door locked  goes off
- Press the button On/Off for some seconds to deactivate the appliance.

 After some minutes from the end of the programme, the energy saving function deactivates the appliance automatically.

1. Remove the laundry from the appliance.
2. Make sure that the drum is empty.

 After drying phase, clean the drum, the seal and the inside of the door with a wet cloth.

## 12. DAILY USE - DRYING ONLY

**WARNING!**  
Refer to Safety chapters.

This appliance is an automatic washer dryer.

### 12.1 Preparation to drying

1. Press the On/Off button for some seconds to activate the appliance.

With a drying-only programme the display does not show the laundry weight and the estimation is deactivated.

2. Load the laundry one item at a time.
3. Turn the programme dial to the programme suitable for the items to dry.
4. Tap on the Mode button twice to exclude washing and perform drying only. The Dry indicator is on. The

indicators  and  appear on the display.

When drying a big amount of laundry, to have good drying performances, make sure that the laundry itself is not rolled up and that is uniformly distributed in the drum.

### 12.2 Drying - Automatic levels

1. Tap on the Auto Drying button repeatedly until the display shows the required dryness level. The indicators in the display illuminate accordingly:

a.  =  **Iron dry:** for cotton items;

b.  =  **Cupboard dry:** for cotton and synthetic items;

- c.  =  **Extra dry:** for cotton items.

#### The display shows the drying programme duration.

To have a good drying by using less energy and in a shorter time, the appliance does not let you set a too low spin speed for the items to be washed and dried.

2. Touch button Start/Pause to start the programme.

In the display the door locked  indicator goes on, the indicator of the running phase starts flashing. The display also shows the remaining programme time.

### 12.3 Timed Drying

1. Tap on the button Time Drying repeatedly to set the desired time value (see the "Timed drying" table the "Programmes" chapter). The drying level indicator goes off and the indicator  comes on. Each time you tap on this button the time value increases by 5 minutes. The display shows the set new time value.
2. Touch the Start/Pause to start the programme.

In the display the door locked  indicator comes on and the indicator of the running phase starts flashing. The display also shows the remaining programme time.

### 12.4 At the end of the drying programme

- The appliance stops automatically.
- The acoustic signals operate (if they are active).
- In the display  comes on.

- The indicator of button Start/Pause goes off. The door locked  goes off
- Press the button On/Off for some seconds to deactivate the appliance.

 After some minutes from the end of the programme, the energy saving function deactivates the appliance automatically.

1. Remove the laundry from the appliance.
2. Make sure that the drum is empty.

 After drying phase, clean the drum, the seal and the inside of the door with a wet cloth.

## 13. FLUFF IN THE FABRICS

During the washing and/or drying phase, some types of fabric, (sponge, wool, sweatshirt) could release fluff.

The released fluff could stick to the fabrics during the next cycle.

This inconvenient increases with technical fabrics.

To prevent the fluff in your laundry, we recommend that you:

- To do not wash dark fabrics after you washed and dried light coloured fabrics (hand towel, wool, sweatshirt) and the contrary.
- To dry this type of fabrics at open air when they are washed the first time.
- To clean the drain filter.
- After the drying phase, clean the empty drum, the gasket and the door with a wet cloth.

**To remove the fluff inside the drum, set a special programme:**

- Empty the drum.
- Clean the drum, the gasket and the door with a wet cloth.
- Set the rinse programme.
- Simultaneously press the Stains/ Prewash and the Anti-crease buttons until the display shows **CLE** to activate the cleaning function.
- Touch the Start/Pause button to start the programme.

 If the appliance is frequently used, carry out the **CLE** programme regularly.

## 14. HINTS AND TIPS

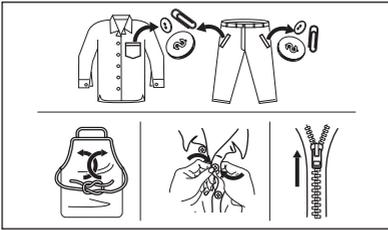

**WARNING!**  
Refer to Safety chapters.

### 14.1 The laundry load

- Divide the laundry into: white, coloured, synthetics, delicates and wool.
  - Follow the washing instructions on the laundry care labels.
  - Do not wash white and coloured items together.
  - Some coloured items can discolour with the first wash. We recommend that you wash them separately for the first couple of times.
- Turn multilayered fabrics, wool and items with printed illustrations inside out.
  - Pre-treat tough stains.
  - Wash heavy soil stains with a special detergent.
  - Be careful with curtains. Remove the hooks and put the curtains in a washing bag or pillowcase.
  - Do not wash laundry without hems or with cuts. Use a washing bag to wash small and/or delicate items (e.g. underwired bras, belts, tights, shoelaces, ribbons, etc. ).

- A very small load can cause balance problems with the spin phase leading to excessive vibration. If this occurs:
  - a. interrupt the programme and open the door (refer to "Daily Use" chapter);
  - b. manually redistribute the load so that the items are spaced evenly around the tub;
  - c. press the Start/Pause button. The spin phase continues.
- Button up pillowcases, close zippers, hooks and poppers. Tie up belts, cords, shoelaces, ribbons and any other loose elements.
- Empty pockets and unfold the items.

## 14.2 Stubborn stains

For some stains, water and detergent is not sufficient.

We recommend that you pre-treat these stains before you put the items in the appliance.

Special stain removers are available. Use the special stain remover that is applicable to the type of stain and fabric.

## 14.3 Detergents type and quantity of detergent

Low sudsing detergent is required for this washing machine to prevent oversudsing problems, unsatisfied washing result and harm to the appliance. Low sudsing detergents designed for front load washing machines are labelled "Front loading", "high efficiency", "HE" or "Matic".

**Do not use wrong types of detergent, such as Top Loading, Handwash detergent or Soap-Based products in your front-load washing machine. This can result in excessive suds, longer cycle time, low spin speeds, poor**

**rinsing and overloading of the motor and, in extreme cases, suds flowing out of the appliance with symptoms similar to water leak.**

## Quantity of detergent to be used

The choice of detergent and use of correct quantities not only affects your wash performance, but also helps to avoid waste and protect the environment.

Although biodegradable, detergents contain substances which in large quantities can upset the delicate balance of nature.

The choice and quantity of detergent will depend on:

- type of fabric (delicates, woollens, cottons, etc);
- the colour of clothes;
- size of the load;
- degree of soil;
- wash temperature; and
- hardness of the water used.

Water hardness is classified by so-called "degrees" of hardness.

Information on hardness of the water in your area can be obtained from the relevant water supply company, or from your local authority.

You may have to try using the detergent quantity as per manufactures' instructions then compare the wash result to the list below and adjust the amount of detergent for your future washes accordingly.

**Not enough washing powder causes:**

- the wash load to turn grey,
- greasy clothes.

**Too much washing powder causes:**

- sudsing,
- reduced washing effect,
- inadequate rinsing.

**Use less detergent if:**

- you are washing a small load,
- the laundry is lightly soiled,
- large amounts of foam during washing.

## 14.4 Ecological hints

- Set a programme without the prewash phase to wash laundry with normal soil.
- Always start a washing programme with the maximum load of laundry allowed.
- If you pre-treat the stains or use a stain remover, set a programme with a low temperature.
- To use the correct quantity of detergent, check the water hardness of your domestic system. Refer to "Water hardness".

## 14.5 Water hardness

If the water hardness in your area is high or moderate, we recommend that you use a water softener for washing machines. In areas where the water hardness is soft it is not necessary to use a water softener.

To find out the water hardness in your area, contact your local water authority.

Use the correct quantity of water softener. Follow the instructions that you find on the packaging of the product.

## 14.6 Prepare the drying cycle

- Open the water tap.
- Check if the drain hose is connected properly. Refer to installation chapter for more information.
- For the maximum laundry load of the drying programmes, refer to the drying programmes table.

## 14.7 Items not suitable for drying

**Do not set a drying programme for this laundry:**

- Synthetic curtains.
- Pieces of clothing with metal inserts.
- Nylon stockings.
- Quilts.
- Bed covers.
- Duvets.
- Anoraks.
- Sleeping bags.
- Fabrics with residue of hair sprays, nail solvents or similar.

- Garments with foam-rubber or materials similar to foam-rubber.

## 14.8 Garment labels

When you dry the laundry, obey the indications on the labels of the manufacturers:

-  = The item can be tumble dried
-  = The drying cycle is at high temperature
-  = The drying cycle is at reduced temperature
-  = The item can not be tumble dried.

## 14.9 Drying cycle duration

The drying time can change depending on:

- speed of the last spin
- dryness level
- type of laundry
- weight of the load

## 14.10 Additional drying

If, at the end of the drying programme, the laundry is still damp, set a short drying cycle again.

### **WARNING!**

**To avoid creasing and shrinkage do not overdry the laundry.**

## 14.11 General Tips

Refer to the «Drying programmes» table to find the **average** drying times. Experience will help you to dry the laundry better. Take note of the duration of the cycles done before.

To avoid the static charge at the end of the drying cycle:

1. Use fabric conditioner in the washing cycle.
2. Use special fabric conditioner for tumble dryers.

When the drying programme is completed remove the laundry promptly.

## 15. CARE AND CLEANING

**WARNING!**  
Refer to Safety chapters.

### 15.1 External cleaning

Clean the appliance with mild soap and warm water only. Fully dry all the surfaces.

**CAUTION!**  
Do not use alcohol, solvents or chemical products.

**CAUTION!**  
Do not clean the metal surfaces with chlorine-based detergent.

### 15.2 Descaling

If the water hardness in your area is high or moderate, we recommend that you use a water descaling product for washing machines.

Regularly examine the drum to check for limescale.

The regular detergents already contain water softening agents, but we recommend to run a cycle with empty drum and a descaling product occasionally.

Always follow the instructions that you find on the packaging of the product.

### 15.3 Maintenance wash

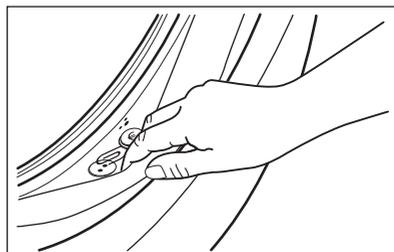

The repeated and prolonged use of low temperature programmes can cause detergent deposits, fluff residues, bacterial growth inside the drum and the tub. This could generate bad odours and mildew.

To eliminate these deposits and hygienize the inner part of the appliance, run a maintenance wash regularly (at least once a month):

1. Remove all laundry from the drum.

2. Run a cotton programme with the highest temperature without detergent or, if available, run the programme.

### 15.4 Door seal

Regularly examine the seal and remove all objects from the inner part.

### 15.5 Cleaning the drum

Regularly examine the drum to prevent unwanted deposits. Rust deposits in the drum may occur due to rusting foreign body in the washing or tap water containing iron.

Clean the drum with special products for stainless steel.

Always follow the instructions that you find on the packaging of the product. Do not clean the drum with acidic descaling products, scouring products containing chlorine or iron or steel.

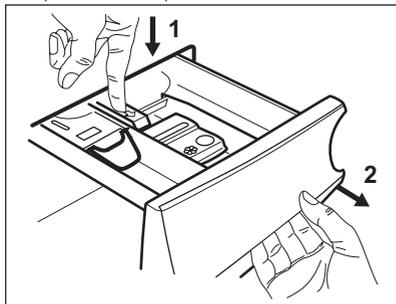

For a thorough clean:

1. Clean the drum with special products for stainless steel.
- 
- Always follow the instructions that you find on the packaging of the product.
2. Run a short cotton programme at high temperature with empty drum or, if available, run the programme.

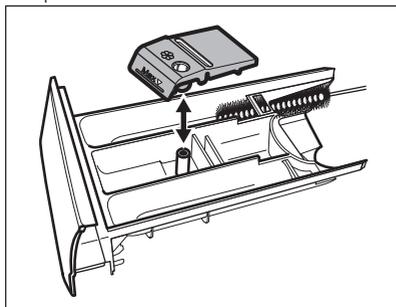

## 15.6 Cleaning the detergent dispenser

To prevent possible deposits of dried detergent or clotted fabric softener and/or formation of mould in the detergent dispenser drawer, once in a while carry out the following cleaning procedure:

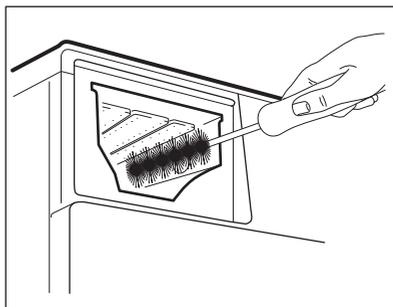

1. Open the drawer. Press the catch downwards as indicated in the picture and pull it out.

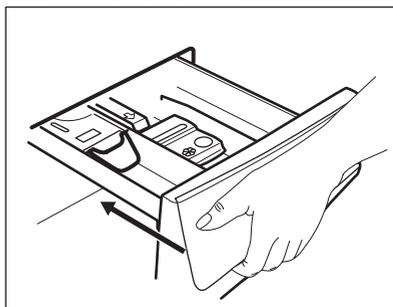

2. Remove the top part of the additive compartment to aid cleaning and flush it out under running warm water, to remove any traces of accumulated detergent. After cleaning, replace the top part in its position.

3. Make sure that all detergent residue is removed from the upper and lower part of the recess. Use a small brush to clean the recess.

4. Insert the detergent drawer into the guide rails and close it. Run the rinsing programme without any clothes in the drum.

## 15.7 Cleaning the drain pump

### WARNING!

Disconnect the mains plug from the mains socket.

Regularly check the drain pump filter and make sure that it is clean.

Clean the drain pump if:

- The appliance does not drain the water.
- The drum does not turn.
- The appliance makes an unusual noise because of the blockage of the drain pump.
- The display shows the alarm code

**E20.**

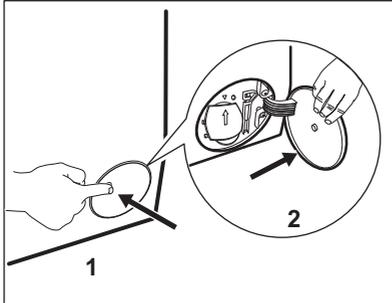

**WARNING!**

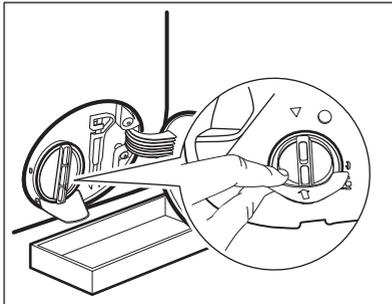

- Do not remove the filter while the appliance operates.
- Do not clean the pump if the water in the appliance is hot. Wait until the water cools down

**Proceed as follows to clean the pump:**

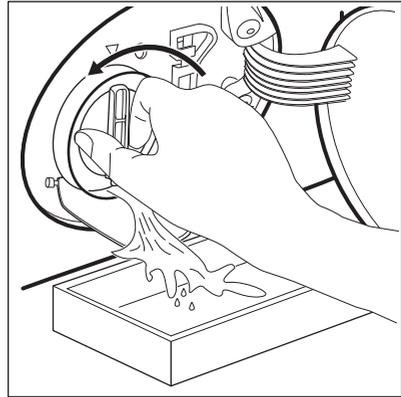

1. Open the pump cover.

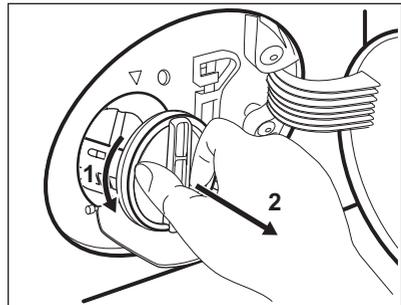

2. Place a suitable bowl below the drain pump access to collect the water that flows out.
3. Open the chute downwards. Always keep a rag nearby to dry up any water spillages when removing the filter.

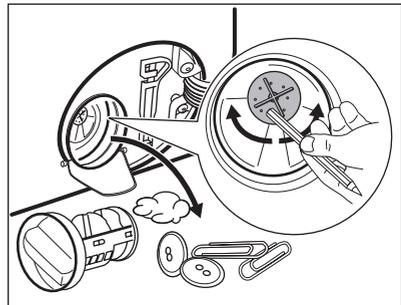

4. Turn the filter 180 degrees in anti-clockwise direction to open it, without removing. Let the water flow out.

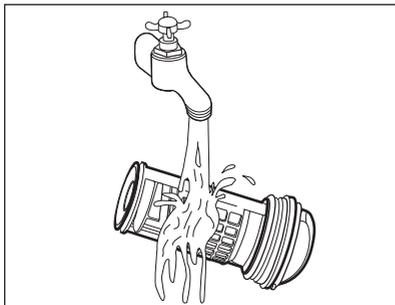

5. When the bowl is full of water, turn the filter back and empty the container.
6. Repeat the steps 4 and 5 until the water stops to flow out.
7. Turn the filter anti-clockwise to remove it.

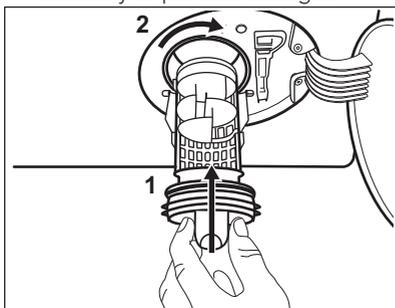

8. If it is necessary, remove fluff and objects from the filter recess.
9. Make sure that the impeller of the pump can rotate. If it does not rotate, contact the Authorised Service Centre.

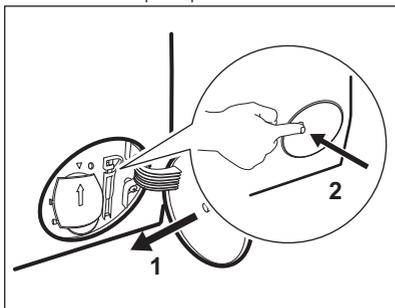

10. Clean the filter under the water tap.

11. Put the filter back into the special guides by turning it clockwise. Make sure that you tighten the filter correctly to prevent leakages.

12. Close the pump cover.

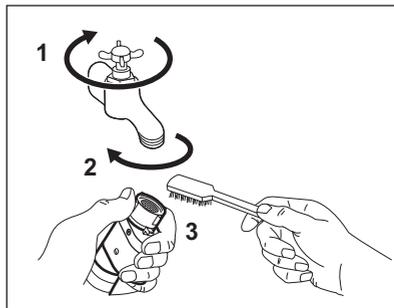

When you drain the water with the emergency drain procedure, you must activate the drain system again:

- a. Put 2 litres of water in the main wash compartment of the detergent dispenser.
- b. Start the programme to drain the water.

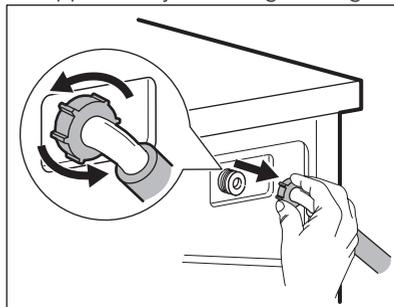

## 15.8 Cleaning the inlet hose and the valve filter

It is recommended to clean both the filters of the inlet hose and valve occasionally to remove any deposit, collected over the time:

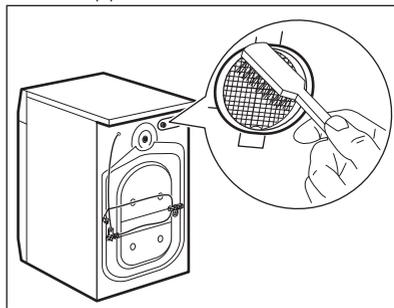

1. Remove the inlet hose from the tap and clean the filter.

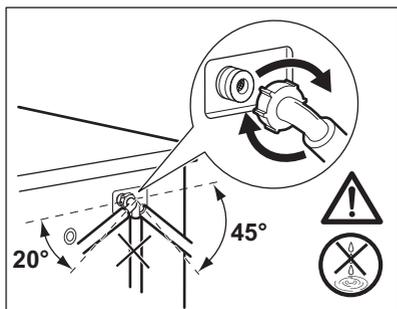

2. Remove the inlet hose from the appliance by loosening the ring nut.

3. Clean the valve filter on the back of the appliance with a toothbrush.

4. When you reconnect the hose to the back of the appliance, turn it left or right (not in vertical position) depending on the position of your water tap.

## 15.9 Emergency drain

If the appliance cannot drain the water, carry out the same procedure, described in 'Cleaning the drain pump' paragraph. If necessary, clean the pump.

When you drain the water with the emergency drain procedure, you must activate the drain system again:

1. Put 2 litres of water in the main wash compartment of the detergent dispenser.
2. Start the programme to drain the water.

## 15.10 Frost precautions

If the appliance is installed in an area where the temperature can reach the values around 0° C or drop below, remove the remaining water from the inlet hose and the drain pump.

1. Disconnect the mains plug from the mains socket.
2. Close the water tap.
3. Put the two ends of the inlet hose in a container and let the water flow out of the hose.
4. Empty the drain pump. Refer to the emergency drain procedure.
5. When the drain pump is empty, install the inlet hose again.

### WARNING!

Make sure that the temperature is higher than 0 °C before you use the appliance again. The manufacturer is not responsible for damages caused by low temperatures.

# 16. TROUBLESHOOTING

### WARNING!

Refer to Safety chapters.

## 16.1 Introduction

The appliance does not start or it stops during operation.

First try to find a solution to the problem (refer to the table). If the problem persists, contact the Authorised Service Centre.

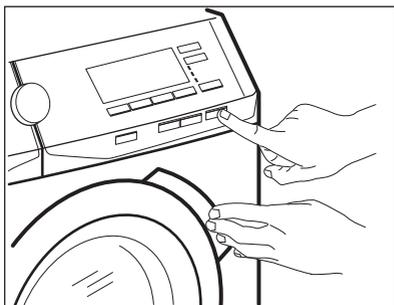

**In case of major problems, the acoustic signals operate, the display shows an alarm code and the Start/Pause button may flash continuously:**

- **E10** - The appliance does not fill with water properly.  
Start the appliance again by pressing Start/Pause button. After 5 seconds the door will be unlocked.
- **E20** - The appliance does not drain the water.

- **E40** - The appliance door is open or not closed correctly. Please check the door!

If the appliance is overloaded, remove some items from the drum and/or keep pressed the door while touching the Start/Pause button until the indicator  stops flashing (see the picture below).

- **E40** - The mains supply is unstable. Wait until the mains supply is stable.
- **E91** - No communication between electronic elements of the appliance. Switch it off and switch on again.

The programme was not finished properly or the appliance stopped too early. If the alarm code appears again, contact the Authorised Service Centre.

- **EFO** - The anti-flood device is on. Disconnect the appliance and close the water tap. Contact the Authorised Service Centre.

**WARNING!**

Deactivate the appliance before carrying out any check.

## 16.2 Possible failures

Problem	Possible solution
The programme does not start.	<ul style="list-style-type: none"> <li>• Make sure that the mains plug is connected to the mains socket.</li> <li>• Make sure that the appliance door is closed.</li> <li>• Make sure that there is no damaged fuse in the fuse box.</li> <li>• Make sure that the Start/Pause has been touched.</li> <li>• If the delay start is set, cancel the setting or wait for the end of countdown.</li> <li>• Deactivate the Child Lock function if it is on.</li> </ul>
The appliance does not fill with water properly.	<ul style="list-style-type: none"> <li>• Make sure that the water tap is open.</li> <li>• Make sure that the pressure of the water supply is not too low. For this information, contact your local water authority.</li> <li>• Make sure that the water tap is not clogged.</li> <li>• Make sure that the inlet hose has no kinks, damages or bends.</li> <li>• Make sure that the connection of the water inlet hose is correct.</li> <li>• Make sure that the filter of the inlet hose and the filter of the valve are not clogged. Refer to "Care and cleaning".</li> </ul>
The appliance fills with water and drains immediately	<ul style="list-style-type: none"> <li>• Make sure that the drain hose is in the correct position. The hose may be positioned too low. Refer to "Installation instruction".</li> </ul>

Problem	Possible solution
The appliance does not drain the water.	<ul style="list-style-type: none"> <li>• Make sure that the sink spigot is not clogged.</li> <li>• Make sure that the drain hose has no kinks or bends.</li> <li>• Make sure that the drain filter is not clogged. Clean the filter, if necessary. Refer to "Care and cleaning".</li> <li>• Make sure that the connection of the drain hose is correct.</li> <li>• Set the drain programme if you set a programme without drain phase.</li> <li>• Set the drain programme if you set an option which ends with water in the tub.</li> </ul>
The spin phase does not operate or the washing cycle lasts longer than usual.	<ul style="list-style-type: none"> <li>• Set the spin programme.</li> <li>• Make sure that the drain filter is not clogged. Clean the filter, if necessary. Refer to "Care and cleaning".</li> <li>• Adjust manually the items in the tub and start the spin phase again. This problem may be caused by balance problems.</li> </ul>
There is water on the floor.	<ul style="list-style-type: none"> <li>• Make sure that the couplings of the water hoses are tight and there is not water leakages.</li> <li>• Make sure that the water inlet hose and the drain hose have no damages.</li> <li>• Make sure you use the correct detergent and the correct quantity of it.</li> <li>• Too much detergent or unsuitable detergent creates too much foam. Reduce detergent quantity and/or use a suitable detergent.</li> </ul>
You cannot open the appliance door.	<ul style="list-style-type: none"> <li>• Make sure that a washing programme that ends with water in tub, has been selected.</li> <li>• Make sure that the washing programme is finished.</li> <li>• Set the drain or the spin programme if there is water in the drum.</li> <li>• Make sure that the appliance receives electrical power.</li> <li>• This problem may be caused by a failure of the appliance. Contact the Authorised Service Centre. If you need to open the door, please read carefully "Emergency door opening".</li> </ul>
The appliance makes an unusual noise and vibrates.	<ul style="list-style-type: none"> <li>• Make sure the levelling of the appliance is correct. Refer to "Installation instruction".</li> <li>• Make sure that the packaging and/or the transit bolts are removed. Refer to "Installation instruction".</li> <li>• Add more laundry in the drum. The load may be too small.</li> </ul>
The programme duration increases or decreases during programme execution.	<ul style="list-style-type: none"> <li>• The ProSense function is able to adjust the programme duration according to the type and the laundry load size. Refer to "The ProSense load detection" in "Daily Use" chapter.</li> </ul>

Problem	Possible solution
The washing results are not satisfactory.	<ul style="list-style-type: none"> <li>• Increase the detergent quantity or use a different detergent.</li> <li>• Use special products to remove the stubborn stains before you wash the laundry.</li> <li>• Make sure that you set the correct temperature.</li> <li>• Decrease the laundry load.</li> </ul>
Too much foam in the drum during the washing cycle.	<ul style="list-style-type: none"> <li>• Reduce the quantity of detergent.</li> <li>• Too much detergent or unsuitable detergent has been used. Reduce detergent quantity and/or use correct detergent.</li> </ul>
After the washing cycle, there are some detergent residues in the dispenser drawer.	<ul style="list-style-type: none"> <li>• Make sure that the flap is in the correct position (UP for powder detergent - DOWN for liquid detergent).</li> <li>• Make sure you have used the detergent dispenser according to the indications given in this user manual.</li> </ul>
The drum is empty and the display shows there is some weight in.	<ul style="list-style-type: none"> <li>• Press the On/Off button to deactivate the appliance and activate it again to set a tare.</li> </ul>
The drum is full but the display shows 0.0 kg.	<ul style="list-style-type: none"> <li>• You loaded the laundry before activating the appliance. Press the On/Off button to deactivate the appliance.</li> <li>• Empty the drum and follow the necessary steps. (Refer to "Loading the laundry")</li> </ul>
The appliance does not dry or does not dry correctly.	<ul style="list-style-type: none"> <li>• Turn the water tap on.</li> <li>• Make sure the drain filter is not clogged.</li> <li>• Reduce the laundry load.</li> <li>• Make sure you have set the correct cycle. if necessary, set again a short drying time.</li> </ul>
The laundry is full of different colours fluff.	<p>The fabrics washed in the previous cycle released fluff of a different colour:</p> <ul style="list-style-type: none"> <li>• The drying phase helps to eliminate some fluff.</li> <li>• Clean the clothes with a fluff remover.</li> </ul> <p>In case of an excessive amount of fluff in the drum run the special programme to clean it (refer to "Fluff in the fabrics" for more details).</p>

After the check, activate the appliance. The programme continues from the point of interruption.

If the problem occurs again, contact the Authorised Service Centre.

If the display shows other alarm codes. Deactivate and activate the appliance. If the problem continues, contact the Authorised Service Centre.

### 16.3 Emergency door opening

In case of power failure or functioning failure the appliance door remains locked. The washing programme continues when the power is restored. If

the door remains locked in case of failure, it is possible to open it using the emergency unlock function.

Before opening the door:

**CAUTION!**  
Risk of burns! Make sure that the water temperature is not too high and the laundry is not hot. If necessary, wait until they cool down.

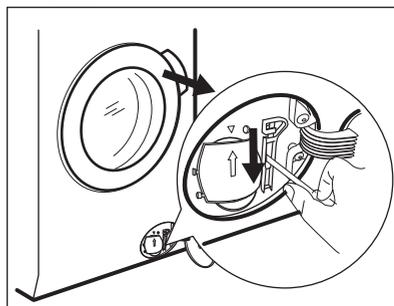

**CAUTION!**  
Risk of injury! Make sure that the drum is not rotating. If necessary, wait until the drum stops rotating.

Make sure that the water level inside the drum is not too high. If necessary, proceed with an emergency drain (refer to «Emergency drain» in «Care and cleaning» chapter).

To open the door, proceed as follows:

1. Press the On/Off button to switch the appliance off.
2. Disconnect the mains plug from the mains socket.
3. Open the filter flap.
4. Pull the emergency unlock trigger downward once. Pull it downward once again, keep it tensed and, in the meanwhile, open the appliance door.

5. Take out the laundry and then close the appliance door.
6. Close the filter flap.

## 17. TECHNICAL DATA

Dimension	Width/ Height/ Depth/ Total depth	600 mm/ 850 mm/ 630 mm/ 660 mm
Electrical connection	Voltage Overall power Fuse Frequency	220-240 V 2200 W 10 A 50 Hz
Level of protection against ingress of solid particles and moisture ensured by the protective cover, except where the low voltage equipment has no protection against moisture		IPX4
Water supply <sup>1)</sup>		Cold water
Water supply pressure	Minimum Maximum	0.5 bar (0.05 MPa) 8 bar (0.8 MPa)
Maximum wash load	Cotton	10 kg
Maximum dry load	Cotton Synthetics	6 kg 4 kg
Spin Speed	Maximum spin speed	1600 rpm

<sup>1)</sup> Connect the water inlet hose to a water tap with a 3/4" thread.

## 18. ACCESSORIES

### 18.1 Available in [www.aeg.com/shop](http://www.aeg.com/shop) or from authorised dealer

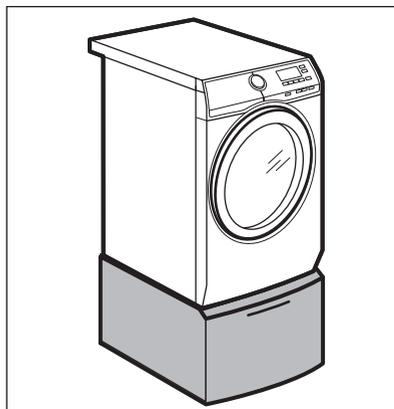

- i** Only appropriate accessories approved by AEG ensure the safety standards of the appliance. If unapproved parts are used, any claims will be invalidated.

### 18.2 Fixing plate kit

If you install the appliance on a plinth, secure the appliance with the fixing plates.

Read carefully the instructions supplied with the accessory.

### 18.3 Pedestal with the drawer

To raise your appliance and make loading and unloading laundry easier.

The drawer can be used for laundry storage e.g.: towels, cleaning products and more.

Read carefully the instructions supplied with the accessory.

## 19. WARRANTY

FOR SALES IN AUSTRALIA AND NEW ZEALAND

ALL AEG BRANDED APPLIANCES

**This document sets out the terms and conditions of the product warranties for AEG Appliances. It is an important document. Please keep it with your proof of purchase documents in a safe place for future reference should there be a manufacturing defect in your Appliance. This warranty is in addition to other rights you may have under the Australian Consumer Law.**

#### 1. In this warranty:

- a) 'ACL' or 'Australian Consumer Law' means Schedule 2 to the Competition and Consumer Act 2010;
- b) 'Appliance' means any Electrolux product purchased by you and accompanied by this document;
- c) 'ASC' means Electrolux's authorised serviced centres;

- d) 'AEG' is the brand controlled by Electrolux Home Products Pty Ltd of 163 O'Riordan Street, Mascot NSW 2020, ABN 51 004 762 341 in respect of Appliances purchased in Australia and Electrolux (NZ) Limited (collectively "Electrolux") of 3-5 Niall Burgess Road, Mount Wellington, in respect of Appliances purchased in New Zealand;
  - e) 'Warranty Period' means the period specified in clause 3 of this warranty;
  - f) 'you' means the purchaser of the Appliance not having purchased the Appliance for re-sale, and 'your' has a corresponding meaning.
- 2. Application:** This warranty only applies to new Appliances, purchased and used in Australia or New Zealand and is in addition to

- (and does not exclude, restrict, or modify in any way) other rights and remedies under a law to which the Appliances or services relate, including any non-excludable statutory guarantees in Australia and New Zealand.
3. **Warranty Period:** Subject to these terms and conditions, this warranty continues for in Australia for a period of 60 months and in New Zealand for a period of 60 months, following the date of original purchase of the Appliance.
  4. **Repair or replace warranty:** During the Warranty Period, Electrolux or its ASC will, at no extra charge if your Appliance is readily accessible for service, without special equipment and subject to these terms and conditions, repair or replace any parts which it considers to be defective. Electrolux may, in its absolute discretion, choose whether the remedy offered for a valid warranty claim is repair or replacement. Electrolux or its ASC may use refurbished parts to repair your Appliance. You agree that any replaced Appliances or parts become the property of Electrolux.
  5. **Travel and transportation costs:** Subject to clause 7, Electrolux will bear the reasonable cost of transportation, travel and delivery of the Appliance to and from Electrolux or its ASC. Travel and transportation will be arranged by Electrolux as part of any valid warranty claim.
  6. **Proof of purchase** is required before you can make a claim under this warranty.
  7. **Exclusions:** You may not make a claim under this warranty unless the defect claimed is due to faulty or defective parts or workmanship. This warranty does not cover:
    - a) light globes, batteries, filters or similar perishable parts;
    - b) parts and Appliances not supplied by Electrolux;
    - c) cosmetic damage which does not affect the operation of the Appliance;
    - d) damage to the Appliance caused by:
      - negligence or accident;
      - misuse or abuse, including failure to properly maintain or service;
      - improper, negligent or faulty servicing or repair works done by anyone other than an Electrolux authorised repairer or ASC;
      - normal wear and tear;
      - power surges, electrical storm damage or incorrect power supply;
      - incomplete or improper installation;
      - incorrect, improper or inappropriate operation;
      - insect or vermin infestation;
      - failure to comply with any additional instructions supplied with the Appliance;
- In addition, Electrolux is not liable under this warranty if:
- the Appliance has been, or Electrolux reasonably believes that the Appliance has been, used for purposes other than those for which the Appliance was intended, including where the Appliance has been used for any non-domestic purpose;
  - the Appliance is modified without authority from Electrolux in writing;
  - the Appliance's serial number or warranty seal has been removed or defaced.
8. **How to claim under this warranty:** To enquire about claiming under this warranty, please follow these steps:
    - a. carefully check the operating instructions, user manual and the terms of this warranty;
    - b. have the model and serial number of the Appliance available;
    - c. have the proof of purchase (e.g. an invoice) available;
    - d. telephone the numbers shown below.
  9. **Australia:** For Appliances and services provided by Electrolux in Australia: Electrolux goods come with guarantees that cannot be excluded under the Australian

Consumer Law. You are entitled to a replacement or refund for a major failure and for compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the Appliance repaired or replaced if the Appliance fails to be of acceptable quality and the failure does not amount to a major failure. 'Acceptable quality' and 'major failure' have the same meaning as referred to in the ACL.

- 10. New Zealand:** For Appliances and services provided by Electrolux in New Zealand, the Appliances come

with a guarantee by Electrolux pursuant to the provisions of the Consumer Guarantees Act, the Sale of Goods Act and the Fair Trading Act. Where the Appliance was purchased in New Zealand for commercial purposes the Consumer Guarantee Act does not apply.

- 11. Confidentiality:** You accept that if you make a warranty claim, Electrolux and its agents including ASC may exchange information in relation to you to enable Electrolux to meet its obligations under this warranty.
